## Skills

React Js

TypeScript

Vue Js

Node Js

Python

Machine Learning

Azure AKS

Docker

MongoDB

Git

## Profile

Passionate JavaScript developer with extensive experience in Vue.js, React.js, and Node.js. In addition to my professional roles, I've worked on personal projects during my studies, including building a portfolio website. Proficient in Python, with hands-on experience using Chainlit and LangChain to create custom chatbots. I value good design and believe that the look and feel of an app are just as important as its core functionality. Enthusiastic about emerging new technologies, currently learning Solidity with plans to explore the Move language.

## Employment History

### Frontend Developer, Next Data Service AG, Berlin

MARCH 2023 – PRESENT

- Successfully migrated a complex Vue 2 Webpack project to React 18, ensuring seamless integration with the ongoing Vue 2 operations.
- Developed internal tools using React 18, streamlining company processes and improving efficiency.
- Led and mentored two frontend working students, instilling best practices in React development while also contributing to backend API enhancements in Python.
- Designed and implemented custom chatbot solutions for German corporations and cities using Chainlit, Langchain, and React.

### [Working Student] Full Stack developer, Unity AG, Hamburg

JULY 2021 – FEBRUARY 2023

- Sole frontend developer for a project digitizing industrial machines, delivering real-time data for remote monitoring, a critical solution during COVID-19. The project received strong customer appreciation and involved collaboration with German authorities.
- Contributed to internal projects aimed at improving company processes.
- Promoted to Frontend Lead at a sister company named Next Data Service, based on project success.

### [Working Student] Full Stack Developer, Wobe Systems GmbH, Kiel

MAY 2019 – JANUARY 2020

- Joined as a working-student developer, focusing on improving a Trello-like project's UI.
- Gained hands-on experience with GraphQL and strengthened my ability to collaborate within a development team.
- Mentored by the team lead, enhancing my skills in frontend (Vue.js, Vuetify, CSS) and backend (Node.js, GraphQL) development.
- Contributed to team discussions, ensuring alignment with project goals and team objectives.
- Adopted a continuous learning approach, balancing independent work with mentorship to further my technical and professional growth.

## Languages

German

English

## Hobbies

Football, learning about new tech in free time, playing games, going out with friends, watching sci-fi movies

## Education

**Bachelor of Engineering in Information Technology, Muffkham Jah College of Engineering and Technology, Hyderabad**

AUGUST 2013 — JUNE 2017

## Extra-curricular activities

### Management and leadership in university projects

- In my third year of bachelor's, I co-hosted an ACM coding event called **Blind Coder**, where participants coded with their screens turned off. The event required strong communication and organizational skills, as I managed a team of six and helped coordinate the event, which awarded a cash prize to the winner.
- During the first semester of my master's program, I led a team of four in developing a web application for user guidance with maps. I guided the development process using Vue.js and Node.js, while another team member was responsible for project documentation. This experience enhanced my leadership and collaboration skills.
